[Reasons for Non-compliance with the Principles of the Corporate Governance Code] Updated

This report is based on the revised version of Japan's Corporate Governance Code effective in June 2021. (This includes principles for companies listed on the Prime Market applicable from April 4, 2022 but excludes principles for companies listed on the Prime Market described in Supplementary Principle 3-1(3)).

The Company complies with all principles set forth in the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code] Updated

(Principle 1.4)

- Cross-shareholdings

〈Policy on cross-shareholdings〉

The Company has a policy of holding shares of any customer or business partner solely on the condition that holding such shares is deemed to have commercial potential in the future and is strategic. The policy is limited to holdings in which the chances of achieving an investment return are high and the holdings contribute to increasing the Company's corporate value.

With regard to such shares we already hold, the Board of Directors examines the reasonability of the holding of individual shares every year and the continuation or reduction of cross-shareholdings will be properly determined from the perspective of the chances of achieving the expected investment purpose or whether or not they are creating economic added-value that may lead to enhancing the Company's corporate value.

Examination results as of the Board of Directors held on June 9, 2021 are as follows:

The Company specifically examined the cross-holding shares the Company holds (all 6 issues), to determine whether or not the purpose of the crossholding is appropriate on an individual issue basis, and whether or not benefits or risks associated with the cross-shareholdings are commensurate with the Company's capital cost. As a result, while it was confirmed that there were issues the holdings of which are appropriate, it was also confirmed that there were some issues the Company is to consider in reducing the holding after examining the significance of the holding them going forward.

〈Standard for exercising voting rights as to cross-shareholdings〉

In exercising voting rights concerning the cross-shareholdings, the Company makes it a rule not to abstain from voting, so as not to give another party carte blanche in principle. Moreover, the Company makes a decision for and against each proposal tabled after examining individual proposals, not using uniform standards such as short-term operating results/share prices, but taking the perspective of whether or not it will help increase the medium- or long-term corporate value of the Company and the companies in which shares are held, in view of non-financial information such as the business policies, strategies and suchlike of the company in which shares are held.

(Principle 1.7)

- Related party transactions

When the Company engages in transactions involving conflict of interest as defined in the Companies Act with any of its Directors, the Company is required to obtain a resolution of the Board of Directors approving the transaction in accordance with the Companies Act and the Board of Directors Regulations.

In addition, the Company ensures the appropriateness of transactions through deliberation and examination of material transactions or actions with a controlling shareholder and material transactions or actions with a related party which is not a controlling shareholder by a Special Committee comprising independent persons including Independent Outside Directors and by the Governance Committee which consists of a majority of Independent Outside Directors respectively prior to approval by resolution at a Board of Directors' meeting attended by Outside Directors and Outside Audit & Supervisory Board Members.

Policy on Determining Remuneration Amounts and Calculation Methods <u>Updated</u>	Established
---	-------------

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

The Governance Committee has been consulted about the policy on determining remuneration for each individual Director. On receiving the response from the Committee, the Board of Directors passed a resolution on said policy at a meeting held on February 25, 2021.

(1) Basic policy

Remuneration for Directors of the Company is designed to attract talented human resources with the ability to implement the Company's Corporate Philosophy and to motivate them to contribute to the sustained improvement of its corporate value. It is the Company's basic policy to determine remuneration paid to each Director at an appropriate level based on his/her position and duties.

(2) Remuneration system for Directors

- Remuneration for Executive Directors comprises fixed basic remuneration (monthly remuneration) and performance-linked remuneration that fluctuates according to performance.

-Remuneration for Non-Executive Directors comprises only fixed basic remuneration (monthly remuneration) from the perspective of their roles and independence.

[Breakdown of remuneration of Executive Directors]

-
-

- The composition ratio for the remuneration of Executive Directors is 63% fixed basic remuneration (cash), 32% bonuses as performance-linked remuneration (cash), and 5% stock as performance-linked remuneration (non-cash).

The above ratio represents remuneration when 100% of all targets for performance-linked remuneration are reached.

[Details of remuneration]

- Details of base remuneration are as follows.

- The Company determines the fixed monthly amount according to the position and responsibilities of each Director, taking into account the standards of other companies based on the research of specialized external institutions.

- Details of bonuses are as follows.

- The Company pays performance-linked bonuses to Executive Directors at certain times of each year as a short-term performance pay based on a performance indicator and the level of goal achievement in the year. The performance indicator that is the basis for bonuses is the level of achievement of the target profit attributable to the Company's shareholders (consolidated) each year. The Company determines the amounts of bonuses by multiplying the base remuneration by a certain coefficient according to the levels of achievement of company-wide performance, division performance, and section performance and a qualitative assessment.

* The comprehensive qualitative assessment is performed by the Representative Director and President, taking into account the level of the goal achievement of each Executive Director (progress in addressing issues in the areas of their responsibility, development of management executives, thoroughness of legal compliance, etc.).

- Details of stock remuneration are as follows.
- As medium- to long-term performance-linked remuneration, Executive Directors are provided with points according to net profit under the Medium-Term Business Plan, the titles of the Directors, and the number of months in their term of office. At the time of their retirement, they acquire a number of the Company's common shares commensurate with the total number of points granted. The number of shares provided is the product of multiplying the number of points given by 1.0.
- This remuneration program is adopted to motivate Directors to contribute to the improvement of the Company's medium- to long-term performance and the increase of its corporate value.
 - *Stock remuneration is adopted to motivate Directors to contribute to the improvement of the Company's medium- to long-term performance and the increase of its corporate value.
- Of the above remuneration, the bonuses and stock remuneration are linked to the Company's business performance, and net profit (consolidated) attributable to the Company's shareholders has been adopted as the indicator for evaluating the overall business performance of the Company. It was adopted to ensure the simplicity of the indicator, consistency with the numerical targets related to the Company's business management (or with the quantitative targets set in the medium-term business plan, which apply to the performance-linked stock remuneration), and in light of the trends of other companies. The consolidated net profit attributable to the Company's shareholders for FY2020 is 12,168 million yen.

(3) Policy, etc. for determining the remuneration of individuals

- To flexibly determine the amount of remuneration for individuals, Kenji Okada, the Representative Director President of the Company, is delegated to determine specifics based on standards established in advance.
- Changes made to the above composition of remuneration, base remuneration, and bonuses require prior reporting to the Board of Directors after consultation with the Governance Committee. Changes in the stock remuneration require approval at a Board of Directors' meeting or a General Meeting of Shareholders.
- The Company has established a system in which the Governance Committee receives one or more reports a year on the overall distribution of remuneration for individual Directors, ensures that such activities are conducted appropriately in line with this policy, and guarantees their objectivity, fairness, and transparency.
- The Board of Directors receives the results of deliberations and examinations, and reports on the appropriate remuneration of individual Directors in line with this policy from the Governance Committee, and the Company believes that the activities of the Board of Directors are also in line with this policy.
