Itochu Enex Reports Consolidated Earnings for the Six Months Ended September 30, 2013 (Under Japanese GAAP)

Tokyo, Japan, October 30, 2013 -- Itochu Enex Co., Ltd. (TSE: 8133) announced net sales of 691,152 million yen for the six months ended September 30, 2013, and net income of 2,929 million yen, or 25.93 yen per share, on a consolidated basis.

Results of Operations

In the six months ended September 30, 2013, the Japanese economy gradually recovered, showing signs of improvements in corporate earnings and personal consumption thanks to effects from the governmental economic and financial administration including the monetary easing policy. However, with a sluggish growth in personal income, adverse effects from the consumption tax hike decided to enforce in April 2014, and other factors, concerns have remained about future personal consumption.

In the petroleum products distribution industry, the procurement cost of crude oil has generally increased due to continuously weakening yen. As for domestic sales volume, fuel oil significantly decreased overall from the corresponding period a year earlier with the bad weather from the end of August 2013 and a continuous fall in demand for heavy oil, while mainly gas oil increased year on year in summer due in part to effects of the extreme heat.

In this operating environment, the Itochu Enex Group is in the final year of a medium-term business plan, Core & Synergy 2013. During the period of the medium-term business plan, we have implemented an extensive growth strategy, centering on the following priority approaches: "Improvement of petroleum product distribution functions", "Development of demand-generating business from the consumer's perspective", "Transformation into a company providing the best mix of energy", and "Active expansion of overseas business".

Amid decreasing domestic demands for petroleum products, we have been optimizing logistics and expanding domestic sales networks in the core petroleum product sales business and LP gas sales business. We have also been building a system to fulfill various social needs for energy, for example, by reinforcing our power generation capacity including renewable energy in the new electric power business.

As a result of the above activities, in the six months ended September 30, 2013, consolidated net sales increased 5.5% year on year to 691,152 million yen. Operating income and ordinary income increased year on year respectively by 8.3% to 4,829 million yen, and 11.1% to 5,116 million yen. Net income rose 82.8% year on year to 2,929 million yen with extraordinary gain on sales of investment securities.

Results of Operations by Segment

As business segments have been added and changed, as stated in segment information, year-on-year comparisons are based on the segments after the change.

Energy Trade Division

The Energy Trade Division earned operating income of 520 million yen (down 6.6% year on year) on net sales of 336,147 million yen (down 0.9% year on year) in the six months ended September 30, 2013.

Despite the growth in global demands for petroleum products, domestic ones have continued to decline. Furthermore, crude oil prices are soaring due to the situation in the Middle East. Consequently, as the domestic petroleum product market has continued sluggish, the business environment remained harsh.

Under such circumstances, though we proactively sought new customers, and secured transactions taking into account domestic and overseas market trends and customers' needs in an effort to expand sales volume in each business, profits decreased from a year earlier.

In order to steadily improve and optimize distribution functions in each business as division's priority issue, we have built an asphalt sales network centering on 13 asphalt terminals nationwide, deployed nine dedicated fuel supply ships in Japan in the marine fuel business for domestic operation, and enhanced 17 AdBlue supply bases nationwide in response to the increasing popularization of urea SCR vehicles¹. Especially in the asphalt business, the second company-owned domestic and ocean-going vessel to carry asphalt was completed in May 2013. We will continue to further reinforce distribution functions in order to respond to diversifying needs of clients, and changes in domestic supply and demand conditions.

Note 1 Urea SCR vehicle: Urea SCR vehicle purifies NOx using urea solution (AdBlue) and Selective Catalytic Reduction to reduce NOx in exhaust gas from diesel engines.

Car-Life Division

The Car-Life Division earned operating income of 872 million yen (down 24.9% year on year) on net sales of 284,930 million yen (up 10.2% year on year).

Though crude oil prices are soaring and domestic demands for petroleum products have continued to decrease, sales volume grew from a year earlier, thanks to, for example, new large-scale affiliates and replacement of Car-Life Stations² at the end of the previous fiscal year and in the current fiscal year. Meanwhile, profits fell year on year with large impacts of profit margin compressed by the deterioration in retail market conditions, despite efforts to reduce costs at each base, and expand profits from non-fuel oil businesses at Group companies.

In the retail strategy, we have strived to improve profitability of Car-Life Stations of the Group, promoting measures such as the detailed follow-up system with "ENEX ACT Program³", which is an interactive seminar with a small number of participants developed for the purpose of strengthening competitiveness of the Stations, as well as support for operation of the Stations through sharing of successful examples.

In the automobile-related business, mainly Enexauto Co., Ltd., a Group company, contributed to an improvement in profitability of Car-Life Stations of the Group, for example, by promoting the car hire business "Itsumo Rent-a-Car", the used vehicle trading business "Itsumo Car Net", and a system to unify management of customers "Car Business Support".

The number of Car-Life Stations of the Group at the end of the six months was 2,181, a net decrease of one station from the end of the previous fiscal year. During the six months, we added 52 newly affiliated stations even amid the decrease in the number of domestic gas stations, while losing 53 stations through disaffiliation of unprofitable and decrepit stations, etc.

Note 2 Car-Life Stations: Car-Life Stations are full-service automobile service stations affiliated with Itochu Enex.

Note 3 ENEX ACT Program: Under this program, we work closely with Car-Life Station operators to raise their competitiveness by analyzing their station operations and competitive climate, conducting group training, and engaging in other activities.

Total Home-Life Division

The Total Home-Life Division earned operating income of 1,299 million yen (up 42.1% year on year) on net sales of 51,763 million yen (up 13.2% year on year).

While sales volume of LP gas almost leveled off from a year earlier, the number of direct sales increased year on year with the area strategy we intensively worked on, for example, establishing ing Energy Corporation to jointly manage LP gas sales business of ing Corporation with Itochu Enex Home-Life Kanto Co., Ltd., a Group company, in the Kanto area.

Profits also grew year on year thanks to the active introduction of gas rate adjustment system and the increased sales of new types of energy equipment.

Under such conditions, in July 2013, we transferred the city gas and LP gas business which had been operated by the Company in Nakatsu City, Oita Prefecture, to Ecore Co., Ltd., a Group company, through company split. Unifying the gas business in the Kyushu area, we will strive to improve the efficiency of business operation, and services to customers further in the area.

In the new energy business, we have continued sales of a double power generation system consisting of a solar power generation system which realizes "Energy Creation" at home, and ENEFARM residential fuel cells. We also conducted "activities to propose the best mix of energy" combining energy-saving and high-performance burning appliances and solar power generation systems through "Smart Life" campaign which started in June 2013. Furthermore, community-based events are held at each "E-koto Shop" operated by the Group in order to proactively perform activities as a community information station.

As part of social contribution activities, we have also implemented a dietary educational activity "Itadakimasu Support Manifesto for Kids" at kindergartens and nursery schools across Japan for the purpose of educating children about "importance of diet".

Power & Utility Division

The Power & Utility Division earned operating income of 2,117 million yen (up 32.4% year on year) on net sales of 17,908 million yen (up 58.2% year on year).

In the electricity and steam supply business, the amount of electricity sold largely increased from a year earlier, with contributions from the reinforcement of power generation facilities and the acquisition of JEN Konbumori Wind Farm Co., Ltd. in the previous fiscal year. Even with the increased cost of sales, profits also grew year on year thanks to prices remaining high in the wholesale power market and profits from the wind power generation business using the renewable energy feed-in tariff system.

Hofu Energy Service Co., Ltd., a Group company, started construction to enhance the coal thermal power generation facility, which is scheduled to complete at the end of March 2014.

In the heat supply business⁴, profits steadily grew, as a result of higher demand for heat for air conditioning due to slightly higher average temperature than usual in the east Japan areas even with the increased cost of sales due to soaring material costs.

In the LNG sales business, sales volume increased year on year with the increased number of new clients, as well as a gradual recovery of operating rate of manufacturing plants.

Note 4 Heat supply business: Heat supply business supplies cold and hot water for air conditioning to office buildings and other multiple buildings from a heat source plant using pipes.

Financial Condition

Total assets amounted to 305,280 million yen at September 30, 2013, a decrease of 18,466 million yen from March 31, 2013. This primarily reflected a decrease in trade notes and accounts receivable. Liabilities amounted to 195,762 million yen, a decrease of 21,454 million yen from March 31, 2013. This primarily reflected a decrease in trade notes and accounts payable and redemption of bonds. Net assets totaled 109,518 million yen, an increase of 2,987 million yen, due to factors including increases in retained earnings and minority interests.

Consolidated Earnings Forecasts

Although operating performance could be affected by various factors, including crude oil prices, market conditions, changes in the weather, and the Japanese government's energy policy, we have not revised our full-year consolidated earnings forecasts announced on May 2, 2013.

Notes:

- 1. "Other" comprises businesses, such as investment business and back-office outsourcing services that are not included in reportable segments.
- 2. The 203 million yen adjustment for segment income is 203 million yen of unallocated corporate income. The main component of the unallocated corporate income is income and loss that are not attributable to reportable segments.
- 3. Segment income adjustments are based on operating income reported on the quarterly consolidated statements of income for the corresponding period.
- 2. Impairment loss on fixed assets or goodwill by reportable segment

Material impairment loss on fixed assets

In response to a decline in market prices, the Company reduced the book value of idle assets in its Energy Trade segment to their net realizable value. An impairment loss of 145 million yen was consequently booked for the six months ended September 30, 2012.

In response to a decline in market prices, the Company reduced the book value of idle assets in its Car-Life segment to their net realizable value. An impairment loss of 14 million yen was consequently booked for the six months ended September 30, 2012.

In response to a decline in market prices, the Company reduced the book value of idle assets in its Total Home-Life segment to their net realizable value. An impairment loss of 31 million yen was consequently booked for the six months ended September 30, 2012.

Six months ended September 30, 2013 (April 1, 2013 to September 30, 2013)

- 2. The negative 5 million yen adjustment for segment income is 5 million yen of unallocated corporate expenses. The main component of the unallocated corporate expenses is income and loss that are not attributable to reportable segments.
- 3. Segment income adjustments are based on operating income reported on the quarterly consolidated statements of income for the corresponding period.

2. Impairment loss on fixed assets or goodwill by reportable segment

872

Material impairment loss on fixed assets

520

In response to a decline in market prices, the Company reduced the book value of idle assets in its Energy Trade segment to their net realizable value. An impairment loss of 202 million yen was consequently booked for the six months ended September 30, 2013.

In response to a decline in market prices and other factors, the Company reduced the book value of idle assets in its Car-Life segment to their net realizable value. An impairment loss of 392 million yen was consequently booked for the six months ended September 30, 2013.

In response to a decline in market prices, the Company reduced the book value of idle assets in its Total Home-Life segment to their net realizable value. An impairment loss of 19 million yen was consequently booked for the six months ended September 30, 2013.

The Company reduced the book value of assets with no possibility of future use in its Power & Utility segment to their net realizable value. An impairment loss of 124 million yen was consequently booked for the six months ended September 30, 2013.

With the decision of head office relocation, the Company reduced the book value of certain corporate assets that are not attributable to reportable segments to their net realizable value. An impairment loss of 102 million yen was consequently booked for the six months ended September 30, 2013.

3. Changes in reportable segments and related information

As the Company is organized into business divisions, our reportable segments correspond to the business divisions.

In the first quarter ended June 30, 2013, positioning the power and utility business and the overseas business as priority fields while expanding and enhancing the existing core petroleum and gas-related business, we implemented the Company-wide organizational reform, in order to improve speed, flexibility, and governance in each field.

According to the reform, we integrated the Industrial Material Division and the Global Trade Division into the Energy Trade Division, as well as the Home-Life Division and the Total-Life Division into the Total Home-Life Division. We also established the new Power & Utility Division. Businesses including the electricity and steam supply business and the heat supply

business which had been previously conducted by the Industrial Material Division were incorporated into this segment.

The segment information for the six months ended September 30, 2012 was stated, classified into the segments used in the six months ended September 30, 2013.
