

## ITOCHU ENEX Introduces TERASEL Solar, a Self-consumption Solar Power Generation Service, at the Headquarters of ONOMICHI KUMIKA INDUSTRY CO., LTD.

ITOCHU ENEX CO., LTD. (Headquartered in Chiyoda-ku, Tokyo; Tomofumi Yoshida, Representative Director, President and CEO; hereafter, "The Company") announces that it has introduced its self-consumption solar power generation service, TERASEL Solar, at the headquarters of ONOMICHI KUMIKA INDUSTRY CO., LTD. (Headquartered in Onomichi-shi, Hiroshima; Teruhiko Ikawa, Representative Director and President).

This fixed-fee service installs solar power generation equipment on the rooftops of plants, warehouses, and other facilities to enable customers to consume the electricity they have generated themselves. In the current situation with every company being required to take environmental measures with the goal of establishing a carbon-free society by 2050, this business model enables customers to reduce CO2 emissions and energy costs through the consumption of eco-friendly electricity they have generated themselves from renewable energy sources.

The amount of power purchased at the headquarters is expected to be reduced by approximately 7% and CO2 emissions are projected to decrease approximately 101 tons from the levels prior to the introduction of this service. The Company will bear the installation costs of the solar power generation equipment and will handle the burdensome task of managing and maintaining the equipment, making this model extremely easy for customers to introduce.

The Company will further strengthen its ties with ONOMICHI KUMIKA INDUSTRY through this service, contributing to the creation of a sustainable society by continuing to provide a range of environmental products centered on the self-consumption solar power generation service, TERASEL Solar.

### 尾道クミカ工業株式会社

	Overview of facilities introduced
Facilities	Headquarters of ONOMICHI KUMIKA INDUSTRY CO., LTD.
Location	2-160 Chojabara, Onomichi, Hiroshima
Solar panels	222.3kW
Estimated CO2 reductions	Annual average of approx. 101 tons
Estimated reduction in purchased electricity	Annual average of 7%
Start of operations	April 3, 2023
